

InfinityDS™ Window Film Series

- Clear, not dark, InfinityDS™ creates a natural, elegant appearance inside and out. Available in both neutral and bronze, colors blend nicely with any home decor.
- Made tough, InfinityDS resists scratches, fading, chips, cracks and exposure to the elements. Even in harsh conditions, the color stays fast.
- Blocking up to 78% of the sun's heat, InfinityDS keeps you cool even in the most intense sunlight.
- InfinityDS blocks out 99% of the sun's damaging ultraviolet rays, keeping upholstery, carpet, curtains and other interior design elements bright and beautiful.
- Reducing glare day and night, this optically superior film actually enhances your view of the outside. No squinting. No eyestrain.
- Preventing shattered glass, InfinityDS protects family members in case of accidents or break-ins.

BLOCK THE SUN ...

InfinityDS™ Window Film Series

You've seen it for years. The light that adds richness to the subtle hues of your sofa is by far its worst enemy. In no time, the sun can bleach the life out of a living room, marking its daily path with faded streaks across your furniture, carpet and floor. Well, not to worry. Now there's InfinityDS from ARMA, a designer series window film made exclusively of special sputtered metals. Created to block up to 78% of the sun's searing rays, this high-tech, micro-thin

...NOT THE VIEW.

shield protects every inch of your interior with museum care. And while it's preserving that special touch you've given your home, it adds a beauty of its own. Clear, not dark, Infinity's subtle hues of neutral or bronze makes everything around it more attractive-inside and out.

You'll save on energy too. With heat staying outside, your air conditioner gets a needed rest. Which means the look that lasts is also a nice investment in the value of your home.

Ask how Infinity DS™ can bring the same protection to commercial settings.
