WINDOW TINTING

The classic warmth of rich hardwood floors. Your antique chaise lounge and oriental rug. Like a master composer, you selectively choose each individual element of your home with meticulous precision and care to create a harmonic blend of color, texture and form. But, behind the elegant beauty of your expansive arched windows lies a sun whose deteriorating effect bring permanent damage and fading to your interior surfaces. Well, now you can protect these priceless investments and increase your home's comfort with the most advanced architectural window film on the market – Symphony™ by ARMA.

## EVERYDAY AN ENCORE PERFORMANCE.

This top-of-the-line dual-reflective film boasts the highest heat rejection of its class thereby keeping your home cooler and protected from harmful ultraviolet (UV) radiation – even in direct sunlight! Moreover, because of its high optical clarity and low interior reflectivity, your enjoyable view of the outdoors will be no less diminished by the application of Symphony to your home's windows. No more squinting or eyestrain. You'll sit in glare-free luxury as Symphony's warm neutral color brilliantly enhances your home's appearance – inside and out. Do not sacrifice your good taste and comfort to the ravages of the sun. Shout "Encore" for Symphony!

**SYMPHONY**  
 ARCHITECTURAL WINDOW FILM FROM **ARMA**  
WINDOW TINTING

- Symphony™ protects your interior furnishings while increasing your home's comfort.
- Symphony creates a natural, elegant appearance inside and out.
- Symphony blocks out 99% of the sun's damaging ultraviolet rays.
- Symphony blocks up to 79% of the solar heat, keeping interior design elements bright and beautiful.
- Symphony's dual-reflective properties keep it optically clear with low interior reflectivity, thereby diminishing the eyestrain and squinting commonly associated with glare.
- Made tough, Symphony resists scratches and fading.
- Full Lifetime Warranty provided with professional installation.
